3.65

## Projects & Experience

### **SOCIAL-MEDIA WEBSITE WITH REACTJS AND TYPESCRIPT:**

- Developed a dynamic social-media website using ReactJS, TypeScript, and Firebase, showcasing strong frontend and modern web development skills.
- Implemented essential features allowing users to register, create posts, and engage in social interactions such as liking and unliking posts.
- Although the project is currently functional but not styled, it demonstrates expertise in building scalable and interactive web applications.

### **FASHION PROJECTS:**

- Designed and implemented a fully responsive website dedicated to showcasing fashion projects.
- Utilized HTML, CSS, and JavaScript to create an engaging and visually appealing user interface across devices.
- Integrated interactive elements to enhance the user experience, demonstrating adaptability and creativity in frontend development.
